

Adjunct Faculty - Research Methods in Medical Imaging

[Apply Now](#)

Company: Massachusetts College of Pharmacy and Health Sciences

Location: United States

Category: educational-instruction-and-library

Job Description

The School of Medical Imaging and Therapeutics seeks an Adjunct faculty member to deliver high-quality learning experiences and education for students in medical imaging and therapy program. The selected candidate will have responsibilities teaching undergraduate students on-line, asynchronously. Subject matters include literature review, designing a research hypothesis and protocol, interpreting and disseminating results. Phases 1, 2 and 3 of an FDA trial.

Provide students with an approved syllabus that includes course objectives and learning outcomes, teaching methodology, attendance policies in line with those of the School, texts and readings, assignments and deliverables, timelines and evaluation criteria

Provide engaging assignments that demonstrate the real-world applications of concepts covered.

Support incorporation of diversity, equity and inclusion into the curriculum, as well as co-curricular experiences, to broaden the education of students and expand their knowledge of health disparities.

Uses the University's learning management system to post syllabus, assignments and other materials and to communicate with students

Advises and assists students through office hours or scheduled appointments, by videoconference, phone or email, and through other University-approved mechanisms

Provides service including student mentoring, ongoing course development, and assessment

Additional responsibilities may be assigned by the supervisor

Requirements

Required:

The ideal candidate will have a background in medical research in the imaging fields.

Master of Science in related health sciences, research or administration

Minimum of 2 years of work experience in medical imaging or radiation therapy

Minimum of 1 year of teaching experience in a college/university, or teaching hospital environment

Commitment to undergraduate, graduate and/or professional education and student success

Excellent organizational and communication skills

Must be able to work independently and effectively interact with a wide array of parties at all levels (students, faculty, administration/staff, alumni, and external constituents, including healthcare industry professionals)
