Role: Application Developer

Location: Hybrid / Germantown, MD.

Job Description:

The Application Developer is responsible for developing databases and writing applications to interface with databases. The position will be designing tables, and storing procedures, views, and functions.

This position will work as part of an integrated team in direct support of the client and other team members in a classified government environment.

Responsibilities:

Develop and test solutions using VBA, .NET, and SQL Server.

Development of database structures, views, stored procedures, functions, and triggers.

Diagnose technical problems and design technical solutions.

Provide technical support for software-related issues to business users.

Create well-designed, testable, and efficient code Review and debug existing source code.

Analyze complex data to develop automated reporting with VBA and Excel.

Designing and implementing new features to existing applications (forms, functions).

Understand the full SDLC.

Keep up-to-date documentation for all new and updated features.

Attend and contribute to project meetings as needed.

Other duties as assigned.

Qualifications and Skills:

Must be detail-oriented and able to meet strict deadlines.

Excellent verbal and written communication skills.

Demonstrate analytical and problem-solving skills.

Solid understanding of all parts of Software Engineering (e.g., Requirements, Design, Implementation, Testing).

Ability to work in a team environment and/or independently with very little functional guidance.

Ability to collaborate successfully with a project team including project management and technical leads and support project disciplines.

Proficient in Visual Studio/Azure DevOps/ Team Foundation Server.

Proficient in MS Office (Word, Excel, PowerPoint, Outlook).

Education and Experience:

Bachelor's degree with 3 or more years of experience or 5 or more years of experience in lieu of degree.

Requirements:

Must be a U.S. Citizen.
