

AWS ETL Data Engineer

[Apply Now](#)

Company: Saviance Technologies

Location: Boston, Massachusetts

Category: architecture-and-engineering

Job Title: AWS ETL Data Engineer

Location: Remote-- East Coast Hours

Duration: 3 Months

About BigRio:

BigRio is a remote-based, technology consulting firm with headquarters in Cambridge, MA. We deliver software solutions ranging from custom development, software implementation, data analytics, and machine learning/AI integrations. We are a one-stop shop that attracts clients from a variety of industries because of our proven ability to deliver cutting-edge and cost-conscious software solutions.

With extensive domain knowledge, BigRio has teams of data architects, data engineers, software engineers, web developers, and consultants who deliver best-in-class solutions across a variety of verticals. Our diverse industry exposure equips us with invaluable tools, tricks, and techniques to tackle complex software and data challenges.

About the Job:

Our forward-thinking Data Engineering team is looking for a contract ETL Engineer with extensive AWS skills. You should have a high level of comfort handling inbound and outbound healthcare or pharmaceutical data and have proven experience building the entire platform from development and testing to production.

You have:

Strong ETL skills with some of the following: AWS tools- Lambda, Kinesis, Data Pipeline, and EMR and/or third-party tools like Airflow or Informatica.

Experience proposing ETL solutions.

Experience setting up and working in AWS platforms-RedShift, Lambda, S3, EC2.

Skills in Python and Scala.

Experience working in the Pharma or healthcare domains.

Experience working with startups.

Your Experience:

5+ years working as a data engineer or in a similar role.

Time spent working as a client-facing consultant.

BS or Masters in Computer Science.
