Company: Bailey

Location: Knoxville

Category: other-general

Bailey sold its first forklift in 1949. Since then, Baily has been a family-owned and operated business dedicated to selling, leasing, renting, servicing, and providing parts for forklift trucks throughout the southeast. The CAD Specialist is responsible for producing accurate and timely CAD drawings for facility and equipment layout proposals. This position will collaborate with sales and service staff to produce warehouse and intralogistics design documents for presentation to customers. Responsibilities: Produce computer aided design (CAD) drawings for facility and equipment layout proposals. Collaborate with sales staff in the design of projects involving warehouse products. Assist in determining and verifying building measurements and other related information required for proper design. Create alternative designs to enhance space utilization, increase product flow, improve efficiency, and reduce cost. Collaborate with sales staff and customers regarding required changes to existing drawings. Meet with sales staff and customers at customer locations. Visit sites before, during and after equipment installation to respond to installation questions and to ensure proper installation. Work closely with Warehouse Solutions team regarding the scheduling and progress of material delivery. Assist in the coordination of equipment required for installation and perform coordination functions as necessary. Handle other duties and special projects as assigned. What we offer: Competitive pay Comprehensive benefits Multiple health plans including one plan with 100% employer paid premiums Generous 401K matching 100% Employer paid short and long term disability Industry-leading time off plan with new employees earning 3 weeks of PTO per year and eligible for up to 5 additional sick days A family owned and operated business that prioritizes the needs of our employees and customers The ability to

grow your career with us through substantial training opportunities for all team members. Training includes both OEM training with our manufacturers and proprietary training developed internally through Bailey University

**Requirements:**The individual in this position should be personable, a problem solver, reliable, ethical, intelligent, highly motivated, and able to adapt to the forces around them—customers, suppliers, department employees, and co-workers.

**Education/Training/Experience:**Associate Degree in CAD or Engineering Degree  
1-3 years experience with technical drawing in a business environment

**Facilities design experience, creating full buildings and spatial dimensioning**Strong problem-solving abilities and attention to detail to ensure accuracy in designs  
**Simulation creation and analysis (preferred)**  
**Experience with warehouse/intralogistics design (preferred)**  
**Experience with Revit or Navisworks (preferred)**

**Skills and abilities:** Strong communication skills  
Proficient computer skills, including Word, Excel, Outlook, etc.  
Willingness to adapt, learn, and take direction  
Ability to maintain a positive presence in the workplace  
Good, safe work habits
