

## Cloud Automation Engineer

[Apply Now](#)

Company: Verdant Infotech Solutions

Location: Copper Canyon, Texas

Category: other-general

Title: Cloud Automation Engineer

Location: Atlanta, GA, Richmond, VA and Chandler, AZ ( Local Only) ( Hybrid- 3 days onsite and 2 days remote)

Visa: USC, GC, GC-EAD, H4EAD

Duration: Long Term

Interview: 2 Videos

Need LinkedIn with profile pic.

Responsibilities:

Write public cloud infrastructure as code automation using tools such as Terraform

Design

Develop public cloud landing zones automation to build core cloud foundational platform services

Develop cloud services provisioning automation with integrated capabilities of IAM, network, security policies as code, and observability

Implement built-in resiliency, observability, and enable FinOps as a part of infrastructure automation to enable cloud IaaS and PaaS services

Develop and maintain cloud services catalog

Develop CI/CD pipelines to build the cloud platform, virtual machine images and containers

Collaborate with technical product management and operations, to deliver the engineering roadmap in Agile model

Partner with Information Security teams to engineer secure app patterns into Cloud platforms

Perform research and gather relevant information to define stakeholders' business problem(s)

Assist in translating business requirements into technical definitions, reference models, blueprints, and playbooks for deployment in compliance with architecture standards and policies

Assist technical Analysts and Infrastructure Engineers by ensuring that technology solutions comply with enterprise system design and engineering standards

Promote an inclusive and healthy working environment and help to resolve organizational impediments/blockers

## Requirements:

4-year degree in Computer Science or a related discipline

3+ years of Cloud Automation Engineer working experience

Significant experience writing Hashicorp Terraform configurations and modules

Experience in DevOps and GitOps models with infra-as-code, config-as-code, policy-as-code, etc.

Proficient in translating designs into fully developed Terraform code

Solid understanding of cloud networking concepts, subnets, routing, load balancing, firewalls, and cloud security

Experience in enterprise-scale environments, building highly available IaaS and PaaS

solutions

Understanding of landing zones, cloud-native security, monitoring and logging tools, and Well-Architected Framework principals

Experience with containers related technologies and CI/CD tools – Jenkins, pipelines, container repos, etc.

Experience in programming and infra-automation tools – Terraform, Ansible, Java, python, etc.

Experience in Cloud logging, monitoring, and observability tools

Proficient in at least one scripting language (i.e. Bash, Python)

Strong analytical, problem solving and organizational skills

Excellent communication skills

Excellent collaboration skills and ability to work in a global team

Experience in financial services industry

Experience on technology and infrastructure teams

Experience in Linux/UNIX system administration

Experience with Container technologies (Kubernetes, Openshift, Docker)

Desired skills:

Strong knowledge of Microsoft Azure Cloud, certification

AWS and GCP

5208 Windsor Ln, Copper Canyon, Texas, 75077
