Data Engineer

Company: People Source Consulting

Location: United States

Category: other-general

Would you be interested in a data engineering role at a fast-paced AI (LLM) start-up comprised of Meta, Google, AWS, and Microsoft alumni? You can expect to:Curate and manage large-scale data ingestion and indexing pipelines, ensuring data quality and error handling.Design robust data processing and indexing pipelines handling large amounts of data across several modalities, ensuring robustness and timeliness.Ensure the secure handling of data through end-to-end encryption, data isolation, and other best practices.Manage cloud orchestration and data infrastructure, applying your expertise with various data processing and indexing tools to ensure scalability and reliability.Work closely with the team to integrate search infrastructure that meets the needs of large language models and retrieval systems.Your first 3 months will include:You have a strong grasp infrastructure, architecture, performance concerns, SDLC and practices. You have successfully enhanced their data ingestion framework, demonstrating significant improvements in the efficiency and scalability of data collection.Your contributions have directly improved the scalability, and performance of their data infrastructure, setting new benchmarks for data quality and access.You are finding opportunities to learn, mentor and promote best practices in areas of your expertise. Your colleagues count on you for your technical advice.A successful candidate will have:Demonstrated experience with building and optimising search infrastructure in a cloud environment.Prior experience working in both small and large companiesA product orientated mindsetStrong programming and engineering skills, with proficiency in Python and experience with cloud infrastructure (AWS, Google Cloud, Azure) and data infrastructure (SQL, NoSQL, inverted indexes, vector databases).Commitment to secure data practices

and a keen interest in staying updated with the latest technologies and methodologies in data engineering.A track record of successfully scaling data pipelines to handle large volumes of data continuously.Independent problem-solver with a passion for data and a proactive approach to overcoming challenges.They operate a hybrid working model with offices in Mountain View. You'll receive a highly competitive salary, equity package, comprehensive health insurance, unlimited PTO, 401K, travel budget, office equipment allowance and VISA sponsorship if required.Apply below to join a challenging in house LLM (large language model) project backed by significant investors!
