Category: other-general

Senior Data Modeler

Remote or Hybrid in Cleveland, OH

6m Contract to Hire

(Unable to Provide Sponsorship or do C2C**)**

Brooksource is seeking a talented Senior Data Modeler to join a Data Architecture Practice to assist with a Digital Transformation. As a Lead Data Modeler, you will be working closely with Data Stewards, API and Microservice Architects, Business Users and Stakeholders, Product and Dev teams, as well as Enterprise Architects to help capture and create the business requirements in logical Data Models.

The Senior Data Modeler is responsible for developing advanced data models associated with the Data Architecture Practice and will have a large involvement with the Data Architecture for future state initiatives. The primary job function entails gathering and assessing business and technical requirements to create/update Data Models, with API connectivity for their upcoming Digital Transformation.

Delivery items include using ERWIN Data Modeler to create and maintain entity relationship diagrams, Data Mesh, Data Fabric, API Development and Specs, and providing supporting documentation as needed. Additional job functions include identifying solution design options, advanced data profiling and subject matter expertise.

Essential Requirements:

5+ years of proven experience **Data Modeling** (Required)

Highly skilled in **ERWIN** and/or **LucidCharts**, including but not limited to: Diagramming, Complete Compare, Reverse Engineering, Forward Engineering

Experience creating data models **Snowflake**, **SQL Server** and **Oracle databases**

Demonstrated ability to recognize, elicit and/or decompose complex business requirements

Demonstrated ability to perceive patterns and relationships in data

Demonstrated ability to design models which integrate data from disparate sources

Demonstrated ability to design data models for complex and ragged hierarchies

Demonstrated ability to design data models for complicated historical perspectives

Understanding of data warehousing and decision support tools and techniques

Strong ability to multi-task with several concurrent issues and projects

Demonstrated ability to interact effectively with all levels of the organization

Strong interpersonal, written and verbal communication skills

Experience advising or mentoring staff regarding data administration, data modeling, and data mapping

Additional Requirements & Areas of Focus:

API Development and Specs

Data Architecture

Software Development Life Cycle (SDLC)

Agile Methodology

Logical and Physical data modeling

Levels of Normalization

Abstraction and Generalization

Subtyping and Classification

Relational model design

Dimensional model design (Star Schemas, Snowflake designs)

Data Profiling

Data security and protecting information

ETL processes, BI processes (Power BI / Tableau)

BENEFITS OF WORKING WITH BROOKSOURCE:

Direct communication with the hiring manager, which allows us to move candidates through the interview process faster.

Dedication to keep an open line of communication and provide full transparency.

We are an equal opportunity employer and value diversity at our company. We do not discriminate based on race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.
