### JOB DESCRIPTION

Battelle delivers when others can't. We conduct research and development, manage national laboratories, design and manufacture products and deliver critical services for our clients—whether they are a multi-national corporation, a small start-up or a government agency.

We recognize and appreciate the value and contributions of individuals with diverse backgrounds and experiences and welcome all qualified individuals to apply.

### Job Summary

We are looking for a skilled Database Administrator to play a role in our migration of on-premise database systems to cloud-based solutions. This is an excellent opportunity to shape our cloud infrastructure strategy and ensure a seamless, secure, and efficient transition of our critical data assets. The ideal candidate will possess deep expertise in SQL Server, Oracle, PostgreSQL and other emerging database platforms, as well as hands-on experience planning and executing successful cloud database migrations.

### Responsibilities

Design and implement comprehensive cloud migration strategies, taking into account performance, security, and cost optimization.

Perform thorough assessments of existing on-premise database environments to determine migration suitability and complexity.

Execute database migrations to cloud platforms such as Azure, AWS, or Google Cloud

Platform, utilizing appropriate migration tools and techniques.

Develop and implement backup, disaster recovery, and high availability strategies within the cloud environment.

Optimize database performance and scalability in the cloud, leveraging cloud-native tools and services.

Collaborate closely with development, operations, and infrastructure teams to ensure a smooth transition and minimize disruption to business operations.

Maintain detailed documentation of database architecture, configuration, and migration processes.

Stay current on emerging database technologies and cloud best practices.

### **Key Qualifications**

Bachelor's degree in Computer Science, Information Systems, or a related field or equivalent experience.

5+ years of proven experience as a Database Administrator, with primary expertise in SQL Server, Oracle, and PostgreSQL.

Demonstrable experience in successfully migrating on-premise databases to cloud platforms.

Strong understanding of cloud infrastructure concepts (IaaS, PaaS, SaaS) and experience with cloud providers like Azure or AWS

Proficiency in database performance tuning, troubleshooting, and optimization techniques.

Familiarity with data replication, ETL processes, and data warehousing concepts.

Excellent communication and interpersonal skills, with the ability to collaborate effectively with technical and non-technical stakeholders.
