Company: Storm4

Location: Arlington

Category: other-general

Director/ Sr. Manager of Electrical Engineering
Renewable Energy Infrastructure & Development
Arlington, VA
\$190k + bonus

Storm4 is currently working with a fast-scaling Independent Power Producer that are developing Renewable Projects across the US. They build projects that create long-term value for local communities, landowners, stakeholders, and the environment.

They are looking for a Director / Sr. Manager of Project Development to oversee, coordinate and manage the entire Electrical & Civil Engineering teams across the development of their large scale Solar projects from origination through development to NTP.

Responsibilities:

Manage & Co-ordinate all in-house electrical engineering, contractors & staff teams across the development of multiple new solar sites from concept to testing all the way through to production

Oversees all progress and timeliness of projects in pipeline, ensuring they meet all goals and objectives

Manages efforts to problem solve for engineering challenges and coordinates with project

consultants and site managers

Collaborate with business analysts, M&A, risk management, and finance teams to determine market potential for new projects

Reviews project reports to ensure projects are on schedule and within budget

Works with project stakeholders, both internal and external, to develop and maintain the project engineering requirements and specifications

Qualifications:

5-7+ years experience as an engineer (preferably in Utility-scale renewable energy space)

Strong technical understanding of drawings and specifications and able to add value to troubleshooting/problem solving communication with contractors & superintendents

Extensive technical knowledge of engineering and product and project development

Experience with design/build construction

Excellent financial skills and ability to analyze financial impacts of engineering requirements and challenges

Proficient in Microsoft Office Suite or similar software

Why Apply:

Collaborate with a diverse and talented team committed to sustainability

Competitive salary and benefits package with great added incentives

Opportunities for professional growth and development joining a fast-scaling team

Help improve Global infrastructure through developing Renewable Energy projects
