*Continuous communication which includes the comprehension of information with colleagues, customers and vendors both in person and remotely

JOB DESCRIPTION:

As a leading technology innovator, Qualcomm pushes the boundaries of what's possible to enable next-generation experiences and drives digital transformation to help create a smarter, connected future for all. As a Qualcomm Software Engineer, you will design, develop, create, modify and validate embedded and cloud edge software, applications, and/or specialized utility programs that launch cutting-edge, world class products that meet and exceed customer needs. Qualcomm Software Engineers collaborate with systems, hardware, architecture, test engineers, and other teams to design system-level software solutions and obtain information on performance requirements and interfaces.

Preferred Qualifications:

* 1+ years of experience with Programming Languages such as C, C++, Java, Python, etc.

* 1+ years of experience with Database Management Software

* 1+ years of experience with API

* 1+ years of work experience with GIT, Perforce or Source Code Management Systems

Principal Duties and Responsibilities:

* Applies Software knowledge to assist and support the design, development, creation, modification and validation of embedded and cloud edge software, applications and/or specialized utility programs.

* Analyzes user needs and software requirements.

* Designs and implements small software features for products and systems.

* Participates in the design, coding for small features, unit testing , minor debugging fixes and integration efforts to ensure projects are completed on schedule.

* Assists in performing code reviews and regression tests as well as the triaging of issues to ensure the quality of code.

* Collaborates with others inside project team to accomplish project objectives.

* Writes technical documentation for Software projects

Level of Responsibility:

* Works under supervision

* Decision-making affects direct area of work and/or work group

* Requires verbal and written communication skills to convey basic, routine factual information

* Tasks require multiple steps which can be performed in various orders; some planning, problem-solving, and prioritization must occur to complete the tasks effectively.
