

Field Service Engineer

[Apply Now](#)

Company: CRC Evans

Location: Katy

Category: other-general

Job Summary:

██████████ a skilled and experienced Field Service Engineer to join our team. As a Field Service Engineer, you will be responsible for the field joint coating equipment maintenance and engineering support on live project sites.

Responsibilities:

██████████ ng support to field activities, including PQT's and new project startups at any location within the Gulf of Mexico.

- Responsible for the maintenance and repair of CRCE field joint coating equipment on one or more project sites.
- Work with the assigned Production Manager on site to ensure that CRCE Equipment is maintained in safe and efficient working order by means of a planned maintenance system, and that appropriate stocks of spares are maintained on site for maintenance of the equipment.
- Develop operational experience of CRCE equipment and systems through recommendations for future improvements.
- Troubleshoot and effect repairs to CRCE equipment in a safe manner with minimal disruption to production activities.
- Maintain excellent levels of communication with the engineering group to ensure lessons are captured for continuous improvement of equipment.
- Complete all required maintenance checks whilst onsite.
- Log maintenance work carried out, highlighting any issues which may require future attention

at the end of the project.

- Where schedules for maintenance of the equipment that are appropriate for the working conditions do not exist, develop new schedules accordingly in conjunction with the engineering group.

- Support the Production Manager and Production Supervisor in the promotion of safety awareness on the site and establishing safe work practices.

Experience:

- Minimum of 5 years' experience within an Electrical Engineer type role, preferably with working knowledge of Hydraulic and Pneumatic systems.

Hands-on experience working in a production environment performing maintenance, fault-finding and repair of mechanical and electrical machinery, including diesel engine plant.

Skills:

In addition to the above experience, the ideal candidate should possess the following skills:

- Solid Engineering knowledge base

- Good communication skills

- Good timekeeping skills; ability to work to tight deadlines and manage own and others time efficiently

- Familiar with PLC control systems, programming and fault-finding and repair.

- Familiar with pneumatic and hydraulic systems, fault-finding and repair.

- Working knowledge of the Health and Safety at Work Act and/or local legislation.

- Be familiar with the safe operation of production line equipment.

- To know and understand the safe operation of project related equipment such as line-up station, powered and lifting rollers.

- Be able to communicate effectively in English both verbally and in writing

- Focus on hazard identification and housekeeping.

If you are a motivated individual with a passion for technical problem-solving, we encourage you to apply for this position. We offer competitive compensation packages and opportunities for career growth within our organization. Join our team of dedicated professionals today!
