Frontend Developer

Apply Now

Company: SalonUltimate

Location: United States

Category: other-general

We are seeking a highly skilled Senior Front-End Developer to play a pivotal role in translating business requirements and technical specifications into intuitive and responsive/adaptive user interfaces. The successful candidate will serve as a crucial link between technical implementation and stakeholder comprehension, ensuring that the delivered solutions are not only user-friendly but also durable, scalable both horizontally and vertically, and easily maintainable over time. The candidate should embrace a collaborative approach rather than solely focusing on completing assigned tasks. It is crucial to engage in open communication with back-end developers to deliver features comprehensively. Additionally, the candidate should be prepared to assume various roles, including back-end development, quality assurance, and business analysis, as necessary to ensure the completion of a feature. Proficiency in English, both written and spoken, is imperative for effectively presenting work, articulating technical concepts, and engaging in clear and confident discussions with fellow team members. This role demands a commitment to delivering solutions that stand the test of time and meet the evolving needs of the business.Key Criteria/Requirements: 4+ years of experience working with React, React Hooks, and Redux. High-level proficiency in TypeScript, Webpack, NPM/Yarn, but also open to alternatives. Experience in developing responsive websites and web applications and ensuring compatibility with a wide range of modern desktop and mobile browsers. Experience with debugging, and performance optimization of React applications. Experience with one or more CSS preprocessors (e.g., Tailwind CSS, Sass, LESS). Experience with one or more CSS frameworks (e.g., Twitter Bootstrap, MUI). Experience with

using one of the test automation frameworks (e.g., Jest, Cypress). Familiarity with Agile/SCRUM development methodology and tools such as Confluence and JIRA. Understanding of REST / HTTP / JWT technologies. Experience with promises, asynchronous requests. Understanding of Object-Oriented Programming (OOP) and design patterns. Experience collaborating with back-end developers, QA engineers, and other team members to deliver complete working features. Experience with full-stack application development is a plus, willingness to understand and debug the system end-to-end is required. Proficiency in Git version control. Experience with code review systems as an author and reviewer, properly providing and reacting to feedback. Experience in providing estimates and adhering to those estimates. Excellent communication, interpersonal, problem-solving skills. Fluent in the English language. Hybrid is 3 days in office, 2 days remote as long as KPIs and performance are maintained and goals are accomplished.Learn more about SalonUltimate Powered by BookedBy:BookedBy was founded in 2019 and has a mission to help businesses maximize their revenue, efficiency, and the happiness of their customers. BookedBy is the online/appointment engine powering Salon Ultimate, a brand of BookedBy. Salon Ultimate, founded in 2012 is an international technology company headquartered in Austin, Texas.
