Full Stack Engineer (React/Node)

Apply Now

Company: SOLTECH

Location: Alpharetta

Category: other-general

Overview:

We are seeking a mid-senior Full Stack Developer to join our client who helps solve the world's most pressing energy challenges across various sectors. You will get a chance to work with an embedded engineering team, learning from the current lead developer, and lead future development and integrations.

Job Details:

As a Full Stack Developer, you are

- Carry out full life-cycle software development: plan, develop, document, test software

- Architect new client interfaces and backend APIs

- Work with other disciplines, including the product owner, systems, UI/UX, embedded software and hardware developer

- Analyzing, writing, building, testing, documenting and deploying software

- Translates design mockups and wireframes into code for web-based applications

- Coding the server-side elements of inCOMMAND

- Weighing in on new UX to insure it works within the overall schema

- Identify new technologies that can add additional visual display capabilities and enhance site usability

Perform backend integration and maintain graphic standards and branding across the UI

Providing feedback to management during the development process

Learn about battery technologies and KPI metrics, for sales, engineering and service support.

Open to travel to laboratory, factory, or customer field visits.

Requirements:

A qualified Full Stack Developer will be able to work very independently and be an effective leader.

4+ years experience in software development

Front End Experience:

Using React.js or Redux for Single Page App development

Back End Experience:

Server side development using runtime and frameworks such as Node.js, Ruby on Rails, and GraphQL

Familiar with DBMS technology, including Postgres, MongoDB, and SQL and caching mechanisms such as Redis and Memcached

Proficient in containerization tools such as Docker as related to microservice development

Skilled in operating container orchestration tools such as AWS Fargate, Kubernetes, or Docker Compose

Using Infrastructure-as-Code languages such as Terraform or Cloud formation, and deploying onto a cloud provider such as AWS or Azure

Location:

Must be able to work in office 5 days a week in Alpharetta, GA.
