

LLVM Compiler Engineer

[Apply Now](#)

Company: Lita

Location: San Francisco

Category: other-general

We are looking for an experienced LLVM backend developer to support compiling high-level languages onto Valida zk-VM.

Key Responsibilities:

- 1 . Design, implement, and maintain Valida's LLVM-based compiler optimizations and features.
- 2 . Support various of programming languages such as C/C++/Rust
- 3 . Collaborate with VM team to test new features and performance improvements.
- 4 . Ensure code quality and maintainability through peer code reviews, unit testing, and documentation.
- 5 . Maintain the SDK toolchain, including compiler, linker and build systems.
- 6 . Stay up-to-date with the latest developments in compiler technology and LLVM community.

Required Skills and Qualifications:

Bachelor's or Master's degree in Computer Science, Engineering, or a related field.

Minimum of 3 years of experience in compiler development, with a focus on LLVM.

Strong C++ programming skills.

In-depth understanding of compiler backend architectures.

Experience with performance analysis and optimization in a compiler context.

Ability to work collaboratively in a team environment and communicate effectively.
