

Manufacturing Technician - Spot

[Apply Now](#)

Company: Boston Dynamics

Location: Waltham

Category: other-general

As a **Manufacturing Technician**, you will join our Spot Production Team to manufacture complex robotic assemblies, identify and debug problems in processes, products, equipment and work for solutions. To thrive in this role, you must be able to interpret engineering and manufacturing documentation and be willing to take on an ever-changing list of tasks and responsibilities as new needs arise within our robot fleet.

Boston Dynamics is a world leader in mobile robots, tackling some of the toughest robotics challenges. For years, our awe-inspiring have shown the world what remarkably capable robots can do. Now we are quickly becoming a recognized leader in automation solutions for industrial applications and warehouse logistics.

Day to day activities:

Assemble complex robotic assemblies in support of the Spot Product Line

Collaborate within a team of multidisciplinary engineers and operations team to deliver quality products across the Spot Product Line

Perform functions associated with all manufacturing operations, including working with engineers in set-up, calibration and troubleshooting tasks, as well as performing rework and quality testing related to the production of parts, components, subassemblies and final assemblies

Work from BOM, Work Instructions, Quality Inspection Protocols, and Manufacturing Test Procedures to guide daily activities and ensure the highest standards of product

quality

Maintain production machines and equipment to ensure the production area is safe to work, productive and has required inventory

Identify and debug problems in processes, products, equipment and work for solutions

Work within Jira to log, track and document activities and resolution of issues.

Required Skills:

Previous experience following technician instructions by interpreting engineering blueprints and technical terms

Experience troubleshooting electromechanical assemblies and recommending courses of action

Experience in testing finished products for defects, debugging failures, and identifying anomalies, as well as understanding and working with test scripts and command prompts

Physically capable of lifting up to 50 pounds unassisted

Preferred skills:

Ensure full adherence to 6S (Sort, Set In Order, Shine, Standardize, Sustain, Safety) practices at all times

Inventory parts and tools used in the assembling process

Engages interest and participation of others and has a collaborative approach to working together

Work independently, reviewed infrequently with minimal supervision

Previous experience utilizing electrical and manual tools, such as soldering irons, desoldering equipment, and solder removal tools

Boston Dynamics will never ask you to divulge your personal financial or account information as part of its recruiting process.
