Company: Vectrus

Location: United States

Category: other-general

Overview

V2X invites applications for the position of Marine Area Manager for the NSF Antarctic Science and Engineering Support Contract (ASESC). This person is responsible for the overall management, supervision and coordination of the USAP Research Vessels (RV) science support and operations. Supervises the coordination, planning, and programming of science support activities; scheduling, permitting, and operations of the RVs; and provides support services to participants working on the RVs.

This position description is subject to change at any time as needed to meet the requirements of the program or company.

Responsibilities

Major Job Activities:

Coordinates and supervises the Marine Science Planning and Science Support:

Coordinates the marine science annual review of the new proposals.

Supervises the Science Cruise Coordinators and the Marine Science Cruise Planning process.

Coordinates the support staffing of cruises aboard the vessels to ensure cruises are adequately staffed with employees qualified to support the science program.

Monitors cruise outbriefs and marine metrics surveys to ensure quality support.

Physical Activities:

Deployment to Antarctica is required in this position, and therefore the individual must successfully complete the physical and dental examinations as required by NSF for deployment to Antarctica. Failure to meet these requirements may result in withdrawal of employment offer or other employment action.

This position is contingent upon successful contract award of the United States Antarctic Program (USAP) National Science Foundation (NSF) Antarctica Science & Engineering Support Contract (ASESC) NOTE: Interim employment offered immediately on a consulting basis. Full time employment contingent upon contract award.

Qualifications

Minimum Qualifications:

. citizenship is required.

Candidate must pass a National Agency Check with Inquiries (NACI) background investigation.

Education / Certifications:

BS or BA from a four-year, accredited institution is required.

Experience / Skills:

5 years' management experience required, with emphasis on advance planning and facilities and infrastructure operations. Experience managing remote sites in harsh environments is desirable.

Demonstrated experience developing and implementing innovative port and marine operations approaches and adopted practices that foster continuous improvement in support operation and management, challenge the status-quo and existing paradigm in formulating and implementing, high-quality, timely, and cost-effective programs.
