

MIM Engineer - remote

[Apply Now](#)

Company: Expert In Recruitment Solutions

Location: Atlanta, Georgia

Category: architecture-and-engineering

Must have a valid LinkedIn profile

Duration: 6+ months

ROLE OVERVIEW

As an Identity Management Engineer your key function will be the successful planning and execution of company's Identity management strategy through the successful planning, deployment operationalization, and support of Identity management systems and services. You will use the Microsoft Identity Manager (MIM) solution to implement the required functionality, policies, and processes across a global and complex environment.

Duties & Responsibilities

As an expert in Microsoft Identity Manager and other related technologies (such as Active Directory) take responsibility for ensuring the full user management lifecycle (create, modify, suspend, remove, etc.) is executed reliably and based on defined security policies and principles.

Run operations of the Identity Management infrastructure and support problem-solving for directories, applications, and other solutions

Integration of MIM Sync Service into a variety of other platforms – some using out-of-the-box management agents (such as SQL server) and in other cases custom development of management agents.

Design MIM Portal workflows for user account management across field and ministry functions

Requirements & Skills

Microsoft Identity Manager training/certification

3-5 years of solid hands-on experience in Identity management systems and services (Active Directory, identity management solutions)

Design, Installation, and Deployment of MIM

MIM Portal customization

Migration of configuration between test and production MIM environments

SQL Server / Azure SQL

C# & PowerShell for development of management agents

Web services/ XML / XPath

Knowledge of Office 365 integration and provisioning

Good understanding of Exchange
