

MPD - Field service Technician

[Apply Now](#)

Company: NOV

Location: Odessa

Category: other-general

NOV is hiring an MPD Field Service Technician. If you're interested in working on the latest and greatest Managed Pressure Drilling and Rotating Control Devices our industry has to offer, then this may be the job for you!! **Hourly Rate Plus Day Pay!!**

PRINCIPAL RESPONSIBILITIES

Ensure full compliance with NOV and customer's HSE policies.

Install and operate the MPD Control System on rigs.

Understand some technical aspects of the MPD activities during the project

Provide project support and technical advice to client, drilling contractor and MPD operational personnel via the Well Site Supervisor (WSS).

Assist with the development of the end of well report (EOWR)

Develop event graphs on regular basis or on customer demand.

PRIMARY ROLES

Ensure the compliance of, and the implementation, of all Q&HSE procedures during the operational project activity.

Calibrate, document, troubleshoot, and repair/replace instrumentation for systems that measure and control level, temperature, pressure, flow, and other process variables.

Assist with rig up and rig down of equipment on each well under the guidance of the WSS.

Develop a systematic approach to troubleshooting and assist where needed.

Maintain a constant support of the drilling operation.

Perform maintenance and system checks on the MPD equipment.

Monitor the operation of the choke manifold and supporting equipment, and to operate system components under the strict guidance of the WSS.

PRIMARY SKILLS REQUIREMENTS

The main roles, include, but are not limited to the following:

Calibration, Maintenance, Repair, Troubleshooting Project Start-up

Operation of MPD System components

Experienced mechanical and electrical aptitude and troubleshooting skills.

Understanding of the MPD Choke Control Software

Basic understanding of setting up and operating the various MPD Applications.

Operate multi-meters and signal generators needed to setup and calibrate instrumentation.

Software skills: MS Office.

EDUCATION REQUIREMENTS

2 plus years of field experience in the oil and gas industry including drilling rig operations.

Computer literate with ability to use Microsoft Office applications, including, but not limited to: Microsoft Word, Microsoft Excel and Microsoft Outlook

Preferred Experience in the Oil & Gas Industry with a minimum of 2-3 years related to MPD/UBD/PMCD operations.

Technical Competency with MPD Operations and Equipment.

Good understanding of Risk Assessment and Mitigation process.

PHYSICAL REQUIREMENTS

The candidate must be capable of climbing, lifting up to 50 pounds, working in a confined space and from elevated platforms, and able to wear appropriate protective equipment.

Position requires working extended hours during an expanded period of time and capable of providing overtime coverage as required.

WORKING CONDITIONS

This is primarily a field position and requires worldwide travel on short notice.

There is no set rotation and individuals can expect to be in the field in excess of 30 days at a time. This position requires shift work with a typical shift length of 12 hours, however, including change-over between shifts and attending required meetings, the average day may be 14 hours.

If a problem with the MPD system occurs when employee is off shift, he/she will be called upon to assist with troubleshooting and repair of the problem. Projects involving MPD are multimillion-dollar ventures and down time or equipment malfunction can produce a highly stressful situation.
