Network Engineer

Apply Now

Company: Eliassen Group

Location: Charlotte

Category: other-general

Hybrid - candidates must be local to Charlotte, NC.

Our communications client is looking for a Network Engineer to join their team.

Due to client requirement, applicants must be willing and able to work on a w2 basis. For our w2 consultants, we offer a great benefits package that includes Medical, Dental, and Vision benefits, 401k with company matching, and life insurance.

Pay Rate: $50.00 - $60.00/hr on W2

Skills, experience, and other compensable factors will be taken into account when determining pay rate. The pay range provided in this posting is a reflection of a W2 hourly rate; other employment options may be available that may result in pay outside of the provided pay range.

W2 employees of Eliassen Group who are regularly scheduled to work 30 or more hours per week are eligible for the following benefits: medical (choice of 3 plans), dental, vision, pre-tax accounts, other voluntary benefits including life and disability insurance, 401(k) with match, and sick time if required by law in the worked-in state/locality.

Responsibilities of the Network Engineer:

Verify design to the network

Confirm material ordered to satisfy the work request

Confirm physical network to design to satisfy work request

Work with other teams to coordinate and complete the work request

Complete accurate impact statements and build Change Request that include a detailed MOP

Full deployment and provisioning of various network optical elements and/or services in order to satisfy the work request

Execute complex migration activity or equipment commissioning in a maintenance window to satisfy work request

Requirements of the Network Engineer:

A Bachelor's degree in Computer Science or related field and at least 3 years of experience with the operation, administration, and maintenance of IP networks

Experience with Juniper MX 240s, 480s, 9600s, Alcantel 7210s, 7750s, Cisco 9k, 7k, Ciena 5171, 8180s, Adva, RAD

Experience with routing protocols, IP transport systems, provisioning and troubleshoot equipment

Ability to receive complex work packages/network designs via workflow tool, interpret the request, and execute the tasks

Ability to self-manage multiple tasks simultaneously across various job assignments

Ability to maintain accurate ticket status

Ability to execute above work on live customer circuits with skillset to avoid workman caused outage

Job ID: 383516
