### **Location**

BMH Bronson Methodist Hospital

### **Title**

Pediatric Clinical Dietitian, Bronson Methodist Hospital

Responsible for providing sound nutrition care for a variety of patients including adult, adolescent, pediatrics and neonatal. In providing sound nutrition care, the Dietitian serves as a member of the multidisciplinary healthcare team and assesses nutrition needs; develops and implements nutrition care plans; evaluates and reports the results appropriately; interprets, evaluates and utilizes pertinent and current research related to nutrition care; and coordinates activities according to department policies and procedures and the goals for the healthcare team. The Dietitian is accountable for setting priorities, meeting deadlines, and promoting the achievement of patient outcomes. In addition to working with the healthcare team, the Dietitian will interact with families. Employees providing direct

patient care must demonstrate competencies specific to the population served.

**Experience in pediatric nutrition preferred.**

Bachelor's degree in Dietetics, Nutrition or verification statement from an ACEND (Accreditation Council for Education in Nutrition and Dietetics) accredited program.

Completion of an ACEND accredited supervised practice program (Dietetic Internship Program, Individual Supervised Practice Pathway, Coordinated program, Future Graduates Program, and International Dietitian Education Program).

Additional education/experience may be required depending on specific department.

Credentialed as a Registered Dietitian or Registered Dietitian Nutritionist by the Commission on Dietetic Registration (CDR) required within 1 year of hire.

Additional certification or progress toward certification completion may be required dependent on an individual's specific position.

Demonstrate a high degree of competency with computers, including the ability to use an Electronic Medical Record (training will be provided).

Proficient in Microsoft Office

Must be able to work independently with minimal supervision

Must possess excellent organizational and communication skills and the ability to manage several projects simultaneously

Work which produces high levels of mental/visual fatigue, e.g., interactive and repetitive or small detailed work requiring alertness and concentration for sustained periods of time, the operation of and full attention to a personal computer or CRT between 40 and 70 percent of the time.

The job produces some physical demands. Typical of jobs that include regular walking, standing, stooping, bending, sitting, and some lifting of light weight objects.

Utilizes nutrition screening criteria and reviews medical records of individual patients to identify patients with increased nutritional risk including in-patients on assigned units, patients with scheduled visits in assigned clinics, and patients scheduled for out-patient

nutrition counseling.

Identifies on-going risk for nutritional problems through regular review of anthropometric, biochemical and laboratory data; documentation of feeding skills; records of parenteral, enteral, and oral intake, diagnosis, or presence of chronic diseases or conditions associated with nutritional risk throughout patient's hospitalization and out-patient's course of treatment.

Documents nutritional assessment by evaluation and interpretation of nutritional intake data; physical, anthropometric, biochemical and laboratory data; normal, immature and dysfunctional and behavioral aspects of feedings skills; and clinical signs and symptoms of nutritional deficiency, inadequacy, excess or toxicity.

Establishes and documents the nutritional plan of care for individual patients by identifying nutritional problems and prescribing nutrition interventions that are age and disease specific, and incorporating these into the patients' overall plans of care.

Reviews medical record and observes patient for response to nutritional plan of care and for changes that indicate unresolved or presence of new nutrition problem(s) and adjusts nutritional aspects of the patient's plan of care accordingly.

Maintains knowledge of dietary guidelines and nutritional standards of care in health and disease and applies these guidelines to patient care and patient education.

Assesses patient/family teaching needs and develops and documents a teaching plan with patient focused outcomes identified.

Participates in developing and documenting a plan for discharge. Maintains knowledge of progression toward discharge and updates nutrition plan as necessary.

Documents plan for follow up with qualifying and/or quantifying statement (identifies what, when and where follow-up, if any, will occur).

Provides phone follow-up when indicated and assists in the continuity of care with primary care providers and dietitians providing follow-up care.

Reviews medical records of individual patients to collect and analyze nutrition related data for Process Improvement and/or Compliance.
