Pega Developer-

Contract

Lisle, IL- Hybrid

We are seeking a skilled Pega developer to join our team and contribute to the design and development of enterprise-level Pega applications. As a Pega developer, you'll play a crucial role in deploying large-scale Pega projects, ensuring seamless business process management, and enhancing customer experience. Here are the key responsibilities and requirements:

Responsibilities:

Requirements Gathering: Collaborate with business managers to understand the company's BPM (Business Process Management) application needs.

Application Design and Development: Design and develop Pega BPM applications, integrating them with external APIs and databases.

Solution Architecture: Perform solution architecture within the Pega PRPC (Pega Rules Process Commander) environment.

Class Structures and Data Models: Design class structures, application frameworks, and data models.

Business Analysis: Coordinate with the project team to ensure that the business architecture aligns with customer requirements.

Integration: Integrate business databases, legacy systems, and web services.

Troubleshooting and Optimization: Troubleshoot application issues, identify coding bugs, and

address bottlenecks.

Performance Testing: Conduct system performance tests to ensure optimal functionality.

Security: Maintain the security of all system applications.

Requirements:

Education: Bachelor's degree in software engineering or computer science.

Experience: Proven work experience as a Pega developer.

Pega Knowledge: Advanced knowledge of Pega Platform 7.x., 8.x, 23.X

Technical Skills: Familiarity with J2EE, XML, Java, JSP, EJB, Angular JS, Java, and JQuery.

Methodology: Familiarity with Scrum and Agile methodology.

Web Technologies: Knowledge of web technologies including JavaScript, CSS, HTML5, and XML.

Project Management: Excellent project management skills.

Problem-Solving: Ability to troubleshoot complex software issues

Location: Lisle, IL
