PHP Developer

Company: For Your Information, Inc.

Location: Washington Highlands, Washington, D.C.

Category: other-general

FYI has an immediate need for a PHP Developer who will assist in the design, development and maintenance of a several in-house business applications to support Corporate Sales, Operations and Finance as well as other departments. Under the guidance of the technical lead, the developer will work with application stakeholders to gather requirements, produce proofs-of-concept, obtain feedback, and complete the development, testing and implementation of the applications.This developer will also assist in maintaining some existing PHP and Java applications.

This position can be located at the following offices: Orverland Park, KS, Atlanta, GA, Herndon, VA or Washington DC.This position required on-site work 5 days a week.

Day to Day Responsibilities:

Analyze technology/capability gaps, research, develop, and deploy software solutions.

Work with project leads to define sprints and associated deliverables.

Collaborate with other developers to design and optimize code.

Conduct integration, test, bug fixes, and other software maintenance activities

Performing requirements analysis and proof of concept or prototyping as needed for engineering and design of corporate applications.

Supporting applications in O&M status by providing enhancements and bug fixes as needed

Coding, testing, and debugging new software or enhancements to existing software.

Developing user interfaces and applications by setting expectations and feature priorities throughout the development life cycle, determining design methodologies and tool sets, completing programming using languages and software products, and designing and conducting tests

Integration of platforms leveraging APIs

Assist in the creation of technical documentation and user guides in support of developed software.

Required Qualifications:

Minimum of 2 years education in Computer Science or similar.

3 or more years PHP web development experience.

2 or more years' experience with Laravel Framework.

2 or more years' experience with MySQL and/or MSSQL.

Demonstrated proficiency with HTML/CSS/Javascript.

Demonstrated experience in all phases of SDLC, OO analysis and design, and revision control systems.

Ability to structure a software project (UI / API / DB)

Highly Desired: ability to write clear, concise, and accurate technical documentation.

Highly Desired: exception verbal communication skills. Ability to converse with end-users, gather requirements and provide feedback in non-technical terms.
