

## Process Engineer

[Apply Now](#)

Company: Thermo Fisher Scientific

Location: Indianapolis

Category: architecture-and-engineering

Identify, define, and action long-term continuous improvement projects through partnership with the site leadership and Operations team.

Evaluate process improvements to reduce cost, improve efficiency, and improvement quality.

Identify, evaluate, and implement process improvement methods for improving worker efficiency, reducing cost, and reducing waste of materials and utilities such as restructuring job duties, reorganizing workflow, relocating workstations and equipment, and purchase of new equipment / technology.

Lead multiple project engineering driven assignments and the associated project schedules, from start to finish with sound project management methodologies.

Collaborates with Production to modify workflow barriers and arrangements to increase throughput.

Evaluates and drive engineering project initiatives to reduce setup time, increase machine speeds, reduce labor hours, reduce reject rates, and improve quality.

Provide technical specifications and supporting documentation for Engineering project designs, and machine upgrades.

Complete deviation investigations, change controls and corrective/preventative actions.

Review and approve Engineering and Validation documents.

Serve as site system administrator for all automated equipment and routine maintenance

## **How will you get here?**

### **Education**

Bachelor of Science Degree in Packaging, Mechanical, Industrial, Electrical Engineering or another scientific subject area from an accredited College or University required

### **Experience**

5 Years Engineering experience in relevant GMP, pharmaceutical or food industry required

### **Knowledge, Skills, Abilities**

Experience with designing, programming, modeling, and testing of automated systems including robotics and clinical packaging equipment to ensure code and configurations meet specifications and validation requirements strongly preferred.

Prior experience working within GAMP 5 and GMP environments strongly desired.

Ability to configure process control system software and recipes and collect/format process data to support production or quality department requests.

Well versed in process improvement, industrial design applications that pertain to a job shop environment.

Experience with blister machines, bottling, carding, labeling, and syringe assembly preferred.

Must be results oriented and comfortable training, mentoring, and coaching peers and multi-functional team members.

Possess analytical skills in Lean Manufacturing, Six Sigma, and Single Minute Exchange of Dies (SMED) to enhance quality, reduce rejects, and streamline processes.

Experience with failure analysis and reliability engineering preferred.

Have strong technical writing skills with experience writing Requirement Specifications (Design, Functional, User), FMEAs, FAT/SAT/Commissioning Protocols, SOPs and Work Instructions desired.

Experience with PLC Automation control system start-ups, loop tuning, solving, and control

system modifications is desired

Experience developing sophisticated process control applications applying a mixture of programming formats including sequential function charts, function blocks and PLC ladder logic preferred

#### Benefits

- Medical, Dental, & Vision benefits – Effective Day 1
- Paid Time Off & Holidays
- 401K Company Match up to 6%
- Tuition Reimbursement – Available after 90 Days!
- Employee Referral Bonus
- Employee Discount Program
- Employee Recognition Program
- Charitable Gift Matching
- Company Paid Parental Leave
- Career Advancement Opportunities

At Thermo Fisher Scientific, each one of our 100,000+ extraordinary minds has a unique story to tell. Join us and contribute to our singular mission—enabling our customers to make the world healthier, cleaner and safer.
