

Project Engineer (BESS/Solar)

[Apply Now](#)

Company: Insight Global

Location: Plant City

Category: transportation-and-material-moving

Required Skills and Experience *

- * Bachelor's degree in engineering (Electrical preferred)
- * 2 years of project engineer experience on BESS or Solar facility site
- * Experience in field utility running electrical projects
- * Experience with inverters larger than 3 MgW
- PMP Certification preferred

Job Description

Insight Global is looking to hire a BESS Engineer for a client in Tampa. Responsibilities include:

- * Development and implementation of commercial & utility scale battery energy storage facilities, solar facilities, and collector station design/equipment specification review; health, criticality, and risk assessments; inspection, monitoring, and testing strategies; performance; safety; environmental and maintenance requirements.
- * Development and implementation of commercial & utility scale battery energy storage facilities, solar facilities, and collector station reliability plan using empirical data to predict reliability performance.
- * Track, analyze and assist in reporting of reliability metrics for commercial & utility scale battery energy storage facilities, solar facilities, and collector station.
- * Assist in the development, implementation and maintenance of a comprehensive data

collection and predictive modeling tool for commercial & utility scale battery energy storage facilities, solar facilities, and collector station that assists in the prioritization of expenditures.

* Assist in the facilitation of system root cause analysis for commercial & utility scale battery energy storage facilities, solar facilities, and collector station. Assist in facilitation and tracking of resulting action plans to maintain appropriate system performance.

* Maintain measurement of commercial & utility scale battery energy storage facilities, solar facilities, and collector station performance to ensure achievement of organization vision and goals through performance benchmarking.

* Participate in the development of commercial & utility scale battery energy storage facilities, solar facilities, and collector station O&M, capital and other budgets and manage expenditures accordingly.
