Company: IBM

Location: Riyadh

Category: other-general

### Introduction

#### Who We Are:

At IBM, work is more than a job - it's a calling: To build. To design. To code. To consult. To think along with clients and sell. To make markets. To invent. To collaborate. Not just to do something better, but to attempt things you've never thought possible. Are you ready to lead in this new era of technology and solve some of the world's most challenging problems? If so, lets talk.

Machine Learning and AI are increasingly powering applications across organizations like financial institutions, healthcare, government etc. In order for AI to be successful and help improve our lives, it must be trustworthy by providing transparency and be explainable.

Organizations are recognizing the importance of a holistic approach to governed data and AI technology in order to manger risk and regulations and to safeguard their brand reputations.

At IBM we are helping people and organizations adopt AI responsibly. Watsonx Governance is an enterprise-grade toolkit to accelerate responsible, transparent and explainable AI workflows. We enable organizations to comply with regulations, demonstrate strong model governance and mitigate business risk using an integrated and transparent approach.

Who you are:

Software Developers at IBM are the backbone of our strategic initiatives to design, code, test, and provide industry-leading solutions that make the world run today - planes and trains take off on time, bank transactions complete in the blink of an eye and the world remains safe because of the work our software developers do. Whether you are working on projects internally or for a client, software development is critical to the success of IBM and our clients worldwide. At IBM, you will use the latest software development tools, techniques and approaches and work with leading minds in the industry to build solutions you can be proud of.

What you'll do:

At IBM, you will be part of the Watsonx Governance team and will build capabilities that enable organizations to deploy and scale AI applications that are compliant with regulations and are trustworthy.

Your Role and Responsibilities

You as a Quality Assurance Engineer, who will Design, develop and/or re-engineer complex product component test cases, and integrate software packages, programs and reusable objects residing on multiple platforms.

You will work in an innovation driven, collaborative development environment that implements trusted AI solutions.

As a Test Automation Engineer you will be responsible for Testing and Automating test cases for AI Governance applications through the full systems development lifecycle.

You will understand customer use cases and technical design and validate software keeping the end user in mind

You will automate functional, integration test cases for both UI and API using the latest technologies and tools

SASW\_24

## Required Technical and Professional Expertise

- \* Knowledge/exposure to test automation technologies
- \* Knowledge of Java and JUnit
- \* Exposure to Linux operating systems and Databases
- \* Exposure to Docker and container orchestration technologies such as Open Shift Container Platform, Kubernetes
- \* Knowledge of JDBC requests, HTTP & HTTPS protocols
- \* Excellent problem solving skills and the zeal to learn quickly and adapt to changing requirements
- \* Ability to collaborate and work independently when required.

## Preferred Technical and Professional Expertise

- \* Knowledge on micro-services
- \* Understanding of different cloud platforms
- \* Shell Scripting, Linux Administration
- \* Exposure to DevOps practices
- \* Knowledge on UI and API automation technologies and tools, such as Selenium, Junit etc

About Business Unit IBM Software infuses core business operations with intelligence—from machine learning to generative AI—to help make organizations more responsive, productive, and resilient. IBM Software helps clients put AI into action now to create real value with trust, speed, and confidence across digital labor, IT automation, application modernization, security, and sustainability. Critical to this is the ability to make use of all data, because AI is only as good as the data that fuels it. In most organizations data is spread across multiple clouds, on premises, in private datacenters, and at the edge. IBM's AI and data platform scales and accelerates the impact of AI with trusted data, and provides leading capabilities to train, tune and deploy AI across business. IBM's hybrid cloud platform is one of the most comprehensive and consistent approach to development, security, and operations across hybrid environments—a flexible foundation for leveraging data, wherever it resides, to

extend AI deep into a business.

Your Life @ IBM In a world where technology never stands still, we understand that, dedication to our clients success, innovation that matters, and trust and personal responsibility in all our relationships, lives in what we do as IBMers as we strive to be the catalyst that makes the world work better.

Being an IBMer means you'll be able to learn and develop yourself and your career, you'll be encouraged to be courageous and experiment everyday, all whilst having continuous trust and support in an environment where everyone can thrive whatever their personal or professional background.

Our IBMers are growth minded, always staying curious, open to feedback and learning new information and skills to constantly transform themselves and our company. They are trusted to provide on-going feedback to help other IBMers grow, as well as collaborate with colleagues keeping in mind a team focused approach to include different perspectives to drive exceptional outcomes for our customers. The courage our IBMers have to make critical decisions everyday is essential to IBM becoming the catalyst for progress, always embracing challenges with resources they have to hand, a can-do attitude and always striving for an outcome focused approach within everything that they do.

Are you ready to be an IBMer?

About IBM IBM's greatest invention is the IBMer. We believe that through the application of intelligence, reason and science, we can improve business, society and the human condition, bringing the power of an open hybrid cloud and AI strategy to life for our clients and partners around the world. Restlessly reinventing since 1911, we are not only one of the largest corporate organizations in the world, we're also one of the biggest technology and consulting employers, with many of the Fortune 50 companies relying on the IBM Cloud to run their business. At IBM, we pride ourselves on being an early adopter of artificial intelligence, quantum computing and blockchain. Now it's time for you to join us on our journey to being a responsible technology innovator and a force for good in the world.

Location Statement For additional information about location requirements, please discuss with the recruiter following submission of your application.

Being You @ IBMIBM is committed to creating a diverse environment and is proud to be an equal-opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, gender, gender identity or expression, sexual orientation, national origin, caste, genetics, pregnancy, disability, neurodivergence, age, veteran status, or other characteristics. IBM is also committed to compliance with all fair employment practices regarding citizenship and immigration status.
