

Quality Engineer (Level 2)

[Apply Now](#)

Company: Lockheed Martin

Location: United States

Category: architecture-and-engineering

Job Description

Lockheed Martin is seeking to hire a Quality Engineering professional to support our Aeronautics facility in Johnstown, PA. The prospective employee will plan, organize, and report on quality related activities such as non-conforming parts and assemblies (both internal & external), raw material issues, production process issues. Ensures control of nonconforming items, conducts root cause analyses, and monitors effectiveness of corrective actions. Collaborates with both internal and external customers including engineering, production, planning, supply chain, and contracts.

The Quality Engineer works on complex technical problems and provides solutions that are highly innovative and ingenious, acts independently to uncover and resolve issues, and participates in teams assembled to accomplish long-range preventive & corrective actions to meet business objectives.

- Applies the quality sciences to reduce product escapes, reduce internal nonconformances, and improve performance.
- Contributes to the development and execution of Quality Site Documents
- Determines/Conducts Operations Process Audits and Surveillances
- Support Material Review Board (MRB) data collection and implementation
- Supports DCMA and 3rd Party Audits of Operations-related scope.
- Performs data analysis to identify trends in quality performance and identifies high drivers.

The Quality Engineer collaborates with other disciplines to include manufacturing engineers, manufacturing support personnel, inspection, suppliers, and the customer on production operations and maintains up-to-date on industry best practices.

What's In It For You

- Medical
- Dental
- 401k
- Paid time off
- Work/life balance
- Career development
- Mentorship opportunities
- Rewards & recognition
- 3 day weekends every weekend!

Our Commitment to DEI

We Hear You, We See You. At LM Aeronautics, we invest in people and promoting the sharing of ideas to create incredible solutions. We know that our success depends on the combined efforts of diverse-thinkers like you! At LM Aeronautics, we cultivate an inclusive environment that appreciates differences and unique thinking.

Our global commitment to diversity and inclusion reflects our values of doing what's right, respecting others and performing with excellence. Learn more here:

At Lockheed Martin Aeronautics, we're taking innovation to the next level. From designing the most advanced air vehicle to designing aircraft that defies gravity, our engineers live on the cutting edge of technology.

Desired skills

- Mechanical, Aerospace, or other appropriate technical/engineering Degree
- ASQ certified quality engineer (ASQ CQE)
- Defense or military contractor experience.
- Working knowledge of SAP, solumina, JDA, QADS, ICA.
- Working knowledge of GD&T, FMEAs, and Root Cause and Corrective Action processes.
- Experience in Six-Sigma (green/black belt) techniques and statistical process control methods.
- Experience with creating/analyzing key performance indicator (KPI) data
- Experience in creating presentations for leadership/customer to effectively communicate nonconformances & RCCA
- Familiarity with working in a factory union environment
- Excellent communication and interpersonal skills, including team building and collaboration.
