Company: RELX

Location: United States

Category: business-and-financial-operations

Do you enjoy being part of a team that works with a diverse range of products /technology?

Are you looking for an innovative internship role?

This internship is part of the Rising TIDE program. Elsevier created its Rising TIDE (T omorrow, I nclusion, D i versity and E quity) internship program to foster inclusion and diversity as well as provide individuals with work experience in the corporate world so that we can develop a pipeline of talent for entry level individuals for post-graduation opportunities.

Every day, scholars around the world conduct research and publish their results in many different fields. Their work often leads to inventions and new companies, to clinical trials that improve health, and to government policies and regulations. Elsevier's Global Strategic Networks (GSN) unit helps monitor the heartbeat of the global research enterprise by tracking what is published - much of it by Elsevier through its extensive scholarly journals - and prior research that is linked to it. We use state-of-the-art data analytics and generative artificial intelligence (Gen AI) to mine and present this bibliometric data in engaging ways that inform governments, foundations, colleges and universities, and researchers about their economic and societal impact and how to invest their resources in support of future research. This work also supports Elsevier's strong commitment to advancing diversity, equity, and inclusiveness (DEI) across institutional settings.

RisingTide

About our Team

About the team: This team helps monitor the heartbeat of the global research enterprise by tracking what is published - much of it by Elsevier through its extensive scholarly journals

About the Role

As a Research Analyst, you will work with members of our team to use data analytics and AI tools to prepare custom infographics and reports. These reports highlight the societal impact of research and contribute to advancing DEI.

Responsibilities

Using data analytics and Gen AI tools to develop infographics and reports. These reports are used for various organizations that illustrate their contributions to societal impact.

Supporting Elsevier staff members in their interactions with research organizations.

Learning how to work with stakeholders in research & development, product development, sales, and marketing.

Requirements

Be a self-starter who is comfortable working alone as well as with a team. Should be able to multi-task and meet deadlines.

Be a recent college graduate or upper undergraduate level status in a relevant field such as data analytics, quantitative social science, library/information science, or STEM. Area of study include (science, technology, engineering, mathematics) by the summer of 2024 in pursuit of a bachelor's degree; an extensive mathematics background is helpful.

Experience with data visualization, research analytics, data analytics, and generative AI.

Proficiency with Microsoft Office (Word, Excel, Outlook, PowerPoint) and ability to learn new systems and software quickly.

Work in a way that works for you

We promote a healthy work/life balance across the organization. We offer an appealing working prospect for our people. With numerous wellbeing initiatives, shared parental leave, study assistance and sabbaticals, we will help you meet your immediate responsibilities and your long-term goals.

Working flexible hours - flexing the times when you work in the day to help you fit everything in and work when you are the most productive.

Working for you

We know that your wellbeing and happiness are key to a long and successful career. These are some of the benefits we are delighted to offer:

Health Benefits: Comprehensive, multi-carrier program for medical, dental and vision benefits

Retirement Benefits: 401(k) with match and an Employee Share Purchase Plan

Wellbeing: Wellness platform with incentives, Headspace app subscription, Employee Assistance and Time-off Programs

Short-and-Long Term Disability, Life and Accidental Death Insurance, Critical Illness, and Hospital Indemnity

Family Benefits, including bonding and family care leaves, adoption and surrogacy benefits

Health Savings, Health Care, Dependent Care and Commuter Spending Accounts

Up to two days of paid leave each to participate in Employee Resource Groups and to volunteer with your charity of choice.

About the Business

A global leader in information and analytics, we help researchers and healthcare

professionals advance science and improve health outcomes for the benefit of society. Building on our publishing heritage, we combine quality information and vast data sets with analytics to support visionary science and research, health education and interactive learning, as well as exceptional healthcare and clinical practice. At Elsevier, your work contributes to the world's grand challenges and a more sustainable future. We harness innovative technologies to support science and healthcare to partner for a better world.

Salary Range

To be added when data can be disclosed

The salary range provided in this posting is the base salary range for NYC. \$18,900.00 - \$31,600.00

Elsevier is an equal opportunity employer: qualified applicants are considered for and treated during employment without regard to race, color, creed, religion, sex, national origin, citizenship status, disability status, protected veteran status, age, marital status, sexual orientation, gender identity, genetic information, or any other characteristic protected by law.
