Company: People Tech Group Inc

Location: Redmond

Category: other-general

### Job Description:

**Position Title: SAP Consultant**

**Location: Redmond, WA**

**Duration: Full Time**

Responsibilities are centered around leveraging SAP HANA's capabilities to optimize and streamline logistics processes within an organization.

Exp in SAP HANA Logistics, this involves defining master data, setting up organizational structures, and configuring business processes within SAP HANA.

Depending on the unique requirements of your organization, you may need to customize or develop additional functionalities within SAP HANA to address specific logistics challenges. This could involve developing custom reports, creating dashboards for real-time analytics, or integrating with third-party logistics systems.

SAP HANA Logistics, it needs to integrate with other SAP modules (such as SAP ERP, SAP S/4HANA) as well as external systems (e.g., warehouse automation systems, transportation management systems). You'll ensure seamless integration between SAP HANA Logistics and these systems to enable end-to-end visibility and control over the logistics processes.

Monitor the performance of the SAP HANA Logistics system and identify areas for optimization.
