

Scientist I - Chemistry

[Apply Now](#)

Company: Intelliswift Software Inc

Location: Sunnyvale, California

Category: other-general

Title: Scientist Chemistry

Location: Sunnyvale, CA

Duration: 12 Months on W2

Shift: 6 AM - 2:30 PM

Key Responsibilities:

Synthesize polymer particles using established chemistries

Participate in process optimization, development, and scale-ups for routine production

Perform analytical characterization of polymeric particles using specialty equipment and instrumentation (including ion-chromatography, particle sizing, and surface area instruments)

Analyze data, derive conclusions, document findings, write SOPs and prepare reports

Present written and oral reports, and collaborate with multidisciplinary groups with R&D and manufacturing divisions

Producing many of the resins that are key to the success of Thermo Fisher's Ion Chromatography portfolio

Follow all EH&S safety requirements, participate in safety improvement activities, and carry out to ISO9001 guidelines and corporate quality policy

The ideal candidate for this position demonstrates Thermo Fisher Scientific values Integrity, Intensity, Innovation and Involvement! This individual enjoys working in a multi-disciplinary

environment and will possess the following combination of education and experience:

Hands on experience in the Chemistry laboratory & wet chemistry

Ability to summarize and present experimental results and have excellent verbal and written communication skills

Must obtain Bachelor's degree in science related field

Able to lift the weights up to 40 lbs and meet all physical demands to work in chemical laboratory
