Senior Data Migration Analyst/Microsoft Dynamics 365

[Apply Now](#)

Company: Signode

Location: Tampa

Category: other-general

About Signode:

With over \$2B in revenue, 80+ manufacturing facilities across 6 continents and over 9,000 employees worldwide, Signode is a leading manufacturer of a broad spectrum of transit packaging consumables, tools, software, and equipment that optimize end-of-line packaging operations and protect products in transit. Signode brings this extensive product portfolio together under hundreds of trusted brands to offer complete transit packaging solutions to its customers.

We produce strap, stretch and protective packaging. We also manufacture packaging tools and equipment used to apply the bulk packaging materials. These commercial packaging products are used to pack, bundle, unitize, protect, and secure goods during warehousing and transit. Our company is a pioneer in the industrial packaging sector with a long history of customer-focused innovations in materials, processes and automation technology that have revolutionized the sector.

Headquartered in Tampa, Florida, we are proud to be the Transit Packaging Division of Crown Holdings, Inc. We are excited to go to market as Signode and to share the portfolio of products, services and capabilities that make us the world's premier end-of-line packaging company.

Benefits:

Signode offers a comprehensive benefits package to full-time employees, which includes health, dental, vision, 401k, paid time off, life insurance, wellness perks, and more.

Benefits begin the month following the hire date.

Summary

The Sr Data Analyst will be responsible for implementing data migration strategy as well as maintaining and managing data for ERPs/CRM systems as requested by the business either via scripts, tools, or other programs. This position is responsible for migrating legacy data to AX 2012 R3/D365(F&O and CE) using SSIS/ADF framework and DXIF. In this role, you will design and implement a migration framework or enhance the existing data migration framework developed by the Signode data team. This role will interact with users, collect daily data maintenance requirements, and create technical solutions. This role will be very hands-on and requires detailed knowledge of the data import export framework in AX 2012/D365 and functional expertise in different AX modules like finance, inventory, sales and order management, and manufacturing. This position will report to the Data and Integration Manager and work with the global team.

Qualifications/Skills:

Bachelor's or Master's Degree in Information Systems, Information Technology, Computer Science or Engineering, or equivalent

8+ years of information technology experience

7+ years of demonstrated experience implementing ERP, including at least two full life cycle implementations in a Data Analyst role.

5+ years of AX 2012/D365 experience

5+ years of DIXF, SQL, and SSIS experience

2+ years of experience using X++ coding.

2+ years of data entities and Azure data factory experience

3+ years of experience using Atlas and writing templates for data uploads and reporting.

Expert knowledge of the data migration framework of AX and D365 F&O/CE

Experience in legacy data migration to AX/D365 F&O

Experience in creating data validation tools, templates, and documentation.

Experience with reporting tools like Management reports, Business documents, Power BI

Experience with ETL in SQL, MS Data Factory, Synapse Pipelines, Store Procedures, Boomi, etc.

Experience with integration tools to move data like Boomi, AIS

D365 F&O data migration experience is preferred.

MDM experience preferred.

Experience with Azure Synapse, Data Lakes, Data Warehouse, SQL Server, Data Bricks, etc.

Key Responsibilities:

Contributing to defining data migration strategy and data load plan

Design and development of SSIS/ADF packages to extract data from legacy systems.

Creating data extract templates and reviewing the data migration requirements with the source system and business teams

Create SQL queries as needed per requirement.

Develop data import export tool (DIXF) and AX development using X++

Use functional experience to validate the migrated data in AX/D365

Create templates using ATLAS to load/update data in different systems.

Data validation of migrated data between legacy and target system

Creating functional and technical specifications

Document business processes, data migration methodologies, data quality enhancements, validations, and reconciliation processes.

Work with the Master data management team to define and maintain master data across

multiple ERPs.

Create data integrations between different systems using middleware like Boomi, AIS etc.

Good team player and ability to work flexible hours and with different functional or area leads to validate data in various sources and destinations.

The Company has reviewed this job description to ensure that essential functions and basic duties have been included. It is intended to provide guidelines for job expectations and the employee's ability to perform the position described. It is not intended to be construed as an exhaustive list of all functions, responsibilities, skills and abilities. Additional functions and requirements may be assigned by supervisors as deemed appropriate. This document does not represent a contract of employment, and the Company reserves the right to change this job description and/or assign tasks for the employee to perform, as the Company may deem appropriate.

Signode Industrial Group, LLC is an Equal Opportunity / Affirmative Action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability or protected veteran status.
