

Senior Datacenter Engineer

[Apply Now](#)

Company: Open Systems Technologies

Location: Philadelphia

Category: other-general

** Need to live within Mid-Atlantic region, Delaware, Maryland, New Jersey, New York, and Pennsylvania and the District of Columbia**

Must have Managed Services experience (MSP) or Information Services experience for this opportunity.

As the Sr. Data Center Engineer, you will be a key contributor delivering engagements with our clients to implement their private and hybrid cloud data center environments utilizing servers, storage, virtualization, orchestration/automation, high-availability, backup, and disaster recovery systems. You will create builds and deliver HyperV storage and EMC VMware virtualization solutions/integrations, and implement in to client environments.

Responsibilities:

Implement, troubleshoot, and support servers, storage, virtualization, orchestration, automation, high-availability, backup, and disaster recovery technologies – Implement, troubleshoot, and support iSCSI, fibre channel, and FCoE / NVME fabrics

Perform data migration and migration planning services

Provide data center performance and capacity analysis

Perform storage, replication, backup, and DR tests and POCs

Deliver customer training and knowledge transfer

Create Service Standards in design, documentation, configuration, and implementation

Preferred Qualifications, Experience and Requirements:

Minimum 5 – 7 years of experience with Dell-EMC products including VxRail, Unity, PowerStore, PowerMax, PowerScale, RecoverPoint / RP4VMs, PowerFlex, Avamar, NetWorker, Data Domain, and PowerProtect Data Manager

Minimum 3-4 years of experience with VMware products including vSphere, SRM, vRealize, vSAN, NSX and VMware Cloud Foundation

Minimum 3-4 years of experience with iSCSI, fibre channel, and FCoE fabrics

Must have experience with server platforms from Cisco, Dell, or HP

Prefer experience with other Hyperconverged, SAN, Backup, and Disaster Recovery technologies (Cohesity, Veeam, Cisco HyperFlex, Nutanix)

Prefer experience with public and hybrid cloud solutions, such as Microsoft, Amazon and VMware Cloud

Must have technical expertise in deployment and troubleshooting data center technology related issues through data collection and analysis

Ability to provide training to customers

Demonstrated ability to work with and communicate with other team members

Must have the ability to analyze existing and anticipated client requirements and promote consideration of companies' solutions and services to meet the client's requirements

Multiple Dell-EMC professional level certifications (EMCIE, EMCTA, Proven Professional)

Multiple VMware professional level certifications (VCP, VCAP or VCDX)

USC / GC holders only.
