Senior Product Software Engineer | Azure | Fullstack C# | Angular

[Apply Now](#)

Company: Wolters Kluwer DXG U.S., Inc.

Location: United States

Category: other-general

Wolters Kluwer is a global leader in professional information services. Professionals in the areas of legal, business, tax, accounting, finance, audit, risk, compliance, and healthcare rely on Wolters Kluwer's market leading information-enabled tools and software solutions to manage their business efficiently, deliver results to their clients, and succeed in an ever more dynamic world. Wolters Kluwer combines deep domain knowledge with specialized technology. Our portfolio offers software tools coupled with content and services that customers need to make decisions with confidence. Every day, our customers make critical decisions to help save lives, improve the way we do business, build better judicial and regulatory systems. We help them get it right.

Key Responsibilities:

Show initiative and motivation to solve problems, adapt to changes, and follow through on tasks.

Work in Agile teams following Agile + SAFe methodologies to deliver high quality products on time.

Participate in special projects such as Greenfield and v1 development, create microservices, integrate third party libraries, and conduct technical research regarding different ways to improve our development environment and best practices.

Develop hybrid cloud applications (SaaS, PaaS, IaaS) that support high availability, high scalability, and parallel processing.

Improve your skills via self-learning, brown bag sessions, and other group learning opportunities that you are always welcome to attend or even lead.

Use the latest development tools and follow industry and Wolters Kluwer technical standards.

Understand the use of technology and how its implementation affects strategic business goals.

Troubleshoot and determine root cause of complex cross product issues and identify action items to drive increased reliability.

Collaborating with the offshore team.

Design, build, test and deliver high quality, complex frameworks and systems and diagnose and resolve complex issues.
