

Senior Staff Bioinformatics Engineer

[Apply Now](#)

Company: Harnham

Location: United States

Category: other-general

Senior Staff Bioinformatics Engineer SF Bay Area - Hybrid Schedule \$150,000 - \$160,000 + Benefits + Bonus An opportunity for a bioinformatician with interest and skills in web development to be a part of building new software products and cloud infrastructure for this innovative Bay Area biotech company. See below and apply today if you feel you are a fit. If you are confident you could do the job well and with enthusiasm but don't possess all skills/experience listed, you are still encouraged to apply!

The Company This innovative small but stable biotech company is building products that help to drive discovery in life sciences. The Role Building from scratch software products and cloud infrastructure to aid the growth of the company's bioinformatics initiatives Full stack web development (candidates can apply with only front-end or back-end experience so far or confidence/interest in growing skills in this area) Able to plan and execute software projects independently and effectively

Desired Skills and Experience Advanced degree in a scientific discipline or a B.S. with extensive relevant experience Previous work experience with NGS data sets highly desired Python Cloud expertise within AWS/GCP or some other cloud computing environment Any front-end web development experience is highly desired (React experience is ideal) Identify first as a bioinformatician despite the software development focus of this description

How To Apply Please register your interest by sending your resume to Tim Lucas via the apply link on this page.
