Senior Technical Product Manager, Data Center GPU Orchestration - CUDA

Apply Now

Company: NVIDIA

Location: United States

Category: arts-design-entertainment-sports-and-media

For over a decade, NVIDIA's accelerated computing platform CUDA has revolutionized HPC and AI with applications ranging from COVID-19 research to autonomous machines. It's a unique legacy of innovation that's fueled by great technology and amazing people. Today the accelerated computing ecosystem is rapidly evolving and requires software compilation technologies that rise to the demands of the world-changing innovation accelerating around us. At the core of this movement lies the software ecosystem that enables developers to invent and build applications to investigate and solve increasingly complex problems. We are looking for a Senior Technical Product Manager to take the lead on how these complex applications are deployed and monitored in the world’s most advanced data centers, helping craft technologies that allow our customers to easily deploy CUDA-enabled applications at scale. As a CUDA Product Manager, you’ll work with developers and NVIDIA’s world-leading engineering teams on requirements for Data Center GPU Manager and other deployment technologies, engage with ISVs, and help to plan and prioritize future development and investment in both hardware and software.

What You'll Be Doing:

Define and Prove – You will bring together insight and build market analysis that provides the data to enter or change new markets through a clear value proposition for your product

Market Intelligence – Understand your developers and further their needs through roadmaps and priority setting

Build and Deliver - Work closely with engineering to set requirements and priorities

Sense and Respond - Engage customers, present at conferences, understand product quality, and monitor critical bugs

Product Launches – Define the go-to-market strategy and contribute to the cross-functional implementation of the plan across Marketing, PR, Sales, etc.

Asset Creation – Work with marketing to define positioning that enables the creation of technical content, including blog posts, webinars, developer tutorials, and more to communicate the product value proposition.

What We Need To See:

Masters in Computer Science, Electrical Engineer, Applied Mathematics, or related engineering field (Ph.D. preferred) or equivalent experience

Experience and familiarity with scientific computing and AI applications

Experience and familiarity with technologies such as Kubernetes, SLURM, Docker, and hypervisors

Relevant experience in a technical product leadership role at a technology company

10+ years experience delivering software, libraries, and SDKs

World-class communication skills with a proven ability to articulate a value proposition to technical and non-technical audiences.

Ways To Stand Out From The Crowd:

Experience managing large-scale clusters

Prior experience developing GPU or AI applications - use of technologies like JAX, OpenAI Triton, etc. a plus

Experience with complex application scheduling. Background with CUDA or GPU computing

We are widely considered to be one of the technology world’s most desirable employers. We

have some of the most dedicated people in the world working with us. If you are agile and autonomous, we want to hear from you.

The base salary range is 160,000 USD - 310,500 USD. Your base salary will be determined based on your location, experience, and the pay of employees in similar positions.

You will also be eligible for equity and *NVIDIA accepts applications on an ongoing basis.*

NVIDIA is committed to fostering a diverse work environment and proud to be an equal opportunity employer. As we highly value diversity in our current and future employees, we do not discriminate (including in our hiring and promotion practices) on the basis of race, religion, color, national origin, gender, gender expression, sexual orientation, age, marital status, veteran status, disability status or any other characteristic protected by law.
