SIEM Engineer

Apply Now

Company: Keeper Security, Inc.

Location: El Dorado Hills

Category: other-general

Keeper Security is hiring an experienced SIEM Engineer to help build our security operations detection capabilities. This is a 100% remote position!

Keeper's cybersecurity software is trusted by millions of users and thousands of organizations, globally. Join one of the fastest-growing cybersecurity companies and be responsible for building out best-in-class detection solutions.

About Keeper

Keeper Security is transforming cybersecurity for organizations around the world with next-generation privileged access management. Keeper's zero-trust and zero-knowledge cybersecurity solutions are FedRAMP and StateRAMP Authorized, FIPS 140-2 validated, as well as SOC 2 and ISO 27001 certified. Keeper deploys in minutes, not months, and seamlessly integrates with any tech stack to prevent breaches, reduce help desk costs and ensure compliance. Trusted by thousands of organizations to protect every user on every device, Keeper is the industry leader for best-in-class password management, secrets management, privileged access, secure remote access and encrypted messaging. Learn more at KeeperSecurity.com.

About The Job

The SIEM Engineer will report to our Head of DevOps, serving as the owner of our detection capabilities. Collaborate with an elite team of industry experts at Keeper to successively innovate and deliver industry-leading detection solutions.

Responsibilities

Build and maintain our cloud security detection capabilities for Security Operations

Research and implement the most ideal way to operationalize log telemetry into our Cloud SIEM at scale

Partner with product management, engineering, security operations and customers to develop roadmaps of content for various integrations and other security concerns

Continuously improve security detection capabilities through the implementation of best practices, product security detection features and the use of AI-based technologies

Partner with DevOps, TechOps and Security Operations teams to deploy and implement detection systems

Requirements

7+ years experience in cloud security engineering, detection engineering or other operational security function

Experience detecting threats at scale through a variety of technologies and datasets using a modern detection engineering approach

In-depth experience with Datadog and Amazon Web Services (AWS)

Experience operating cloud native technologies including Kubernetes, Docker and Terraform

An understanding of modern cloud native attacker techniques and familiarity with

technical controls to prevent and detect attacks

Proficient understanding of Windows and Linux internals and associated telemetry to detect threats at runtime

Ability to build cross-functional relationships, influence and collaborate at all organizational levels

Outstanding verbal and written communications skills for a global audience

Benefits

Medical, Dental & Vision (Inclusive of domestic partnerships)

Employer Paid Life Insurance & Employee/Spouse/Child Supplemental life

Voluntary Short/Long Term Disability Insurance

401k (Roth/Traditional)

A generous PTO plan that celebrates your commitment and seniority (including paid Bereavement/Jury Duty, etc)

Above market annual bonuses

Keeper Security, Inc. is an equal opportunity employer and participant in the U.S. Federal

E-Verify program. We celebrate diversity and are committed to creating an inclusive environment for all employees.

Classification: Exempt
