About ProofID

ProofID is a leading Identity and Access Management (IAM) specialist. With a global presence, UK HQ and offices in the US, we help organizations effectively manage their digital identities. Our extensive experience with top IAM software vendors enables us to deliver unmatched value as a trusted partner for identity management programs.

At ProofID, our mission is clear - we strive to provide pain-free, secure, and seamless digital user experiences for our clients. Whether it's addressing legacy systems, compliance issues, or M&A transitions, our team has the expertise to navigate complex projects and ensure smooth implementations.

With over 100 employees worldwide, we still maintain a close-knit culture. Join us at ProofID and be part of an exciting journey towards revolutionising identity management while working alongside world-leading customers.

Role Summary:

The Solutions Architect is required to propose and design IAM solutions for ProofID customers in keeping with customer business requirements and industry best practice. The senior architect is required to provide technical leadership for the subsequent development and implementation of those solutions in conjunction with other functions.

Key Responsibilities

Discover and analyse customer needs in the context of the customer's broader business aims and objectives by taking input from stakeholders and users

Able to facilitate groups in discovery and design workshops and direct groups to make decisions

Propose and design IAM solutions in both green and brownfield environments

Able to translate complex and multi-disciplinary cross-business requirements into IAM solutions and migration roadmaps

Collates and clearly documents architectural proposals that include an assessment of strategic fit, risks, impacts and delivery recommendations. Ensures proposals are up-to-date over the lifetime of the product

Good understanding of the application of industry best practices design and architecture principles and standards; e.g. TOGAF (The Open Group Architecture Framework), and their impact on the creation of designs

Owns, develops and maintains technical roadmaps for solutions, managing levels of technology risk in conjunction with project and delivery teams

Actively contribute to the formation and evolution of ProofID practice, continuously improving / evolving methodologies and coaching / guiding other team members across the organisation

Key Competencies

Experience with the Ping Identity Stack

Knowledgeable about wider cyber security issues

Evidence of working in an agile / DevOps / continuous improvement methodology

Evidence of working on complex engagements and giving a clear account of the issues the solution generated and the benefits achieved

SFIA Research Level 5/6

Evidence of being able to manage several complex projects at various stages concurrently

Our Values

WE DO GREAT WORK WE VALUE OUR CUSTOMERS

WE SUPPORT OUR COLLEAGUES WE ARE CURIOUS

ProofID is an equal opportunity employer. We do not discriminate based on sex, gender identity, ethnicity, religion, sexual orientation, neurodiversity, disability or any other protected basis because we believe the best and brightest come from all walks of life. We aspire to foster a community in which diversity is valued in both our employees and our ideas.
