Company: Softworld, a Kelly Company

Location: Sandy Springs

Category: other-general

Job Title: Sr. EPPM FICO Functional Specialist

Location: Atlanta GA 30305 **Hybrid**

Onsite Requirements:

10+ years in SAP

EPPM/PS/FISCO Experience

Experience configuring systems during project implementation.

Job Description:

The EPPM & FICO Functional Specialist will collaborate with key business resources, system implementor and AMS provider in providing functional expertise for the SAP EPPM module to the Construction LoB.

The main responsibilities for the role will include but will not be limited to designing EPPM/PS/FICO solutions, configuring systems during project implementations, simplifying, and improving business processes, creating new business cases, identifying, and documenting requirements, supporting construction processes and integrations for Construction business.

Major Duties/Responsibilities:

Works closely with the construction business units across all divisions, using SAP S/4 HANA to best configure and support their business client processes.

Evaluates construction business processes and identifies opportunities for improvements and savings. Prepares cost-benefit analyses to support all improvements and opportunities.

Leads EPPM related project activities and coordinates with other team members to deliver on business requirements.

Provides leadership, direction, and issue resolutions to end-user community regarding EPPM business processes, PS and FI data, enhancements, and interfaces.

Provides solutions, directions, and options for new business requirements.

Provides guidance, understanding, and recommendations to the business user-community in the SAP EPPM/PS/FICO area.

Follows IT standards, documentation, development methodologies as related to support and development activities.

Executes project activities related to EPPM/PS/FICO function ensuring quality and on-time delivery.

Proactively anticipates project deviations and escalates the need for immediate corrective action.

Acts as the gatekeeper of the SAP template for the Construction functional area and ensures that project teams are adhering to the standards established.

Maintains documentation library for design, configuration and training material related to EPPM processes.

Assists with performing integration, unit and user acceptance testing, including preparation of test cases and writing test scripts.

Supports security design and maintenance as required, including oversight of approvals for finance, ensuring they meet organizational standards.

Coordinates with external vendors and Banks regarding system integrations and upgrades

Investigates, analyzes and escalated support issues from Construction business team.

Supports cross functional priorities.

Leads ongoing reviews of business processes and develops optimization strategies.

Other duties as assigned.

Knowledge/Skills/Abilities Required:

10+ years of SAP EPPM/PS/FICO experience including functional expertise and integration with other modules and systems especially in the Construction industry.

In-depth knowledge and extensive hands-on experience on configuring and supporting SAP EPPM, FI, CO, PS, AP, AR and interfaces with bidding software(B2W) other non-SAP systems.

In-depth understanding of the integration between EPPM, FI, MM, SD, PM, and PP is essential.

Strong business process knowledge in revenue recognition processes: RAR.

Strong business process knowledge in EPPM and PS.

Knowledge of Vertex or other Tax solutions that integrate with SAP.

Ability to assess the impact of new requirements on an existing suite of complex applications.

3-5 full lifecycle implementation projects as EPPM/PS/FICO functional/configuration team member.

Be able to independently solve complex functional issues.

Experienced with utilizing OSS and submitting support messages to SAP.

Experience with SAP Data Migration and Interfaces

Experience working with Cross-Functional Teams (SD/MM/PM/PP/LIS/BW) to develop

functional and technical designs.

Experience in managing customer expectations and building relationships.

Demonstrated ability to operate and adapt in an ever-changing environment to changing requirements and priorities.

Ability to identify solution gaps and disconnects in existing solutions; ability to work with the on- and off-shore development teams to explain the proposed design and share best practices.

Strong ability to focus on priorities.

Experience working in a support team environment with a combination of project work (change request) and support (tickets)

Good analytical and problem-solving skills

Demonstrated organizational and time management skills.

Excellent verbal and written communication skills

Required:

QUALIFICATIONS

10+ years of experience as SAP EPPM/PS/FI Functional Consultant preferable in the construction or mining industry.

Education:

Bachelor's/University Degree or equivalent experience

Preferred field of study:

Business Administration or Information Technology

Other Training/Certifications Required:SAP Certification in EPPM, FICO, PS modules is highly desired.
