Company: eTeam Inc.

Location: Deerfield, Illinois
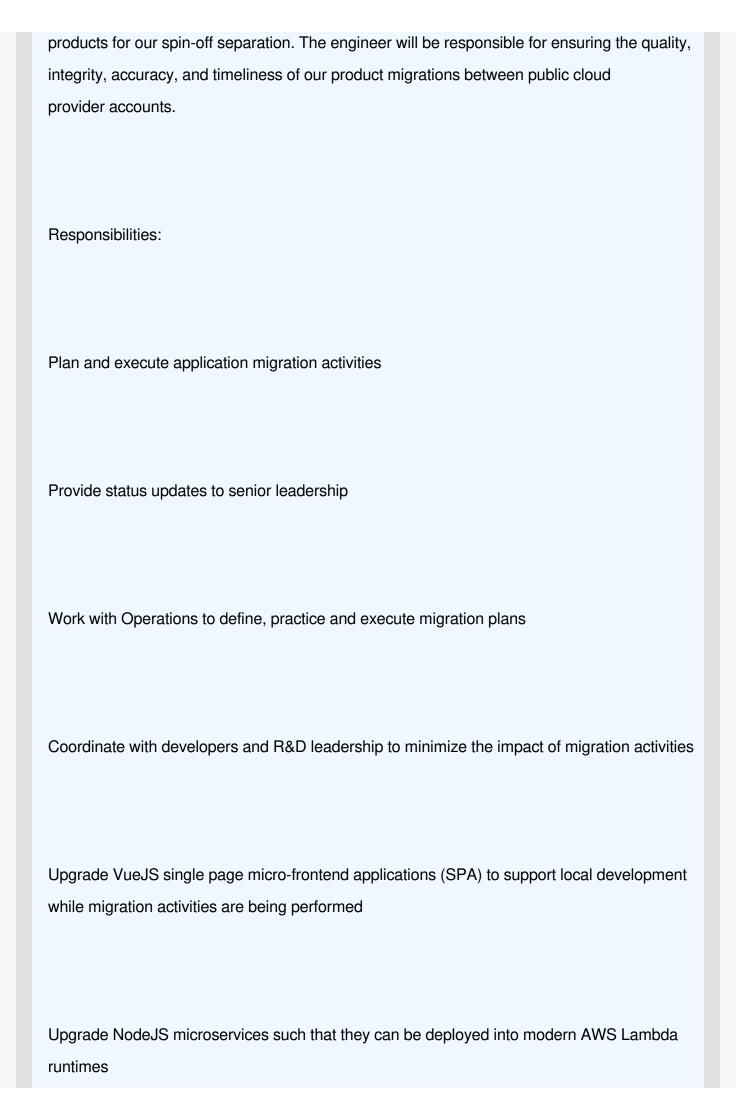

Category: other-general

Title: Senior DevOps Engineer
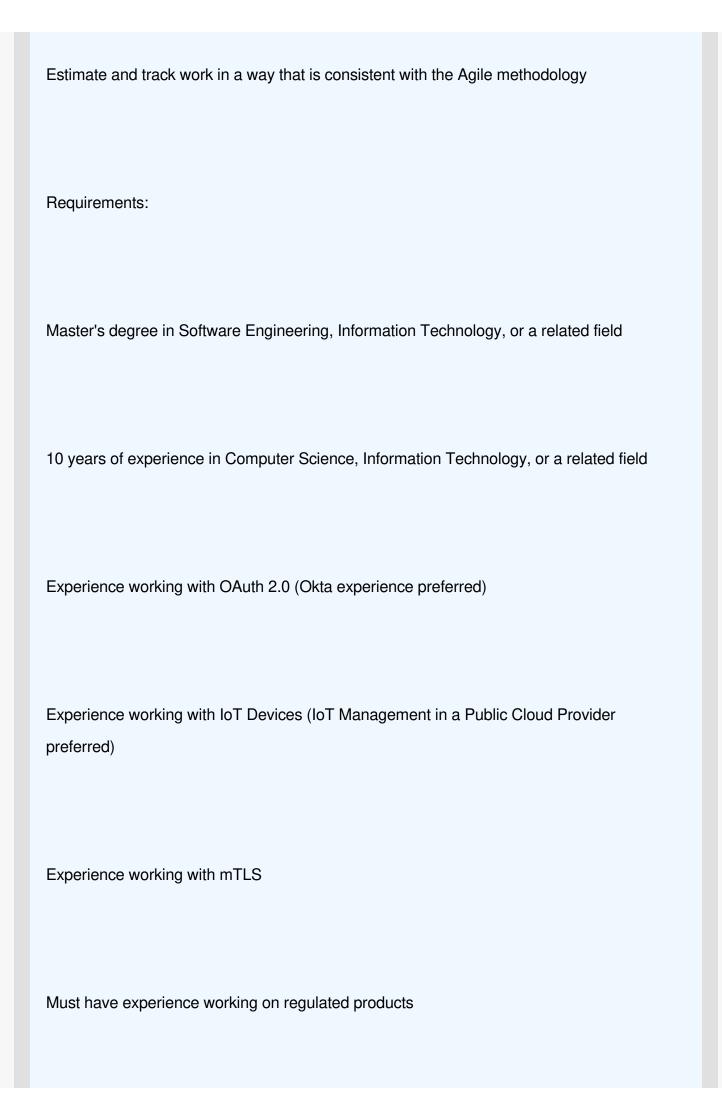

Location: Deerfield, IL

Hybrid - 3 days a week onsite

Duration: 12 Months

Pay Rate: $80.00/hr on W2 to $85.00/hr on W2

Experienced DevOps engineer to lead our effort to move and improvecommercial digital

products for our spin-off separation. The engineer will be responsible for ensuring the quality, integrity, accuracy, and timeliness of our product migrations between public cloud provider accounts.

Responsibilities:

Plan and execute application migration activities

Provide status updates to senior leadership

Work with Operations to define, practice and execute migration plans

Coordinate with developers and R&D leadership to minimize the impact of migration activities

Upgrade VueJS single page micro-frontend applications (SPA) to support local development while migration activities are being performed

Upgrade NodeJS microservices such that they can be deployed into modern AWS Lambda runtimes

Migrate medical IoT Devices

Work with infrastructure engineers to migrate legacy CloudFormation templates to Python (CDK)

Identify and document opportunities for improvement as applications are migrated

Develop scripts to automatically test the operability of an application after it has been migrated

Develop scripts to automatically test the accuracy of database migration activities

Work within a 24-hour delivery cycle by giving and receiving handoffs to engineers in our India development center

Generate technical documentation that captures the deployed state of our digital products

Estimate and track work in a way that is consistent with the Agile methodology

Requirements:

Master's degree in Software Engineering, Information Technology, or a related field

10 years of experience in Computer Science, Information Technology, or a related field

Experience working with OAuth 2.0 (Okta experience preferred)

Experience working with IoT Devices (IoT Management in a Public Cloud Provider preferred)

Experience working with mTLS

Must have experience working on regulated products

Must have experience hosting applications on public cloud providers

Strong understanding of Change Control concepts

Strong understanding of Configuration Management concepts

Strong communication and interpersonal skills

Must have a history of working on productive Agile development teams

Ability to work independently, take initiative, and drive projects to completion

Strong application debugging experience

Strong problem-solving and analytical skills

Demonstrated understanding of the Software Development Lifecycle

Knowledge of continuous integration and continuous delivery (CI/CD)

Demonstrated ability to quickly achieve a working acumen of new technologies
