

VP, Operations Engineering

[Apply Now](#)

Company: Harper Harrison

Location: Dallas

Category: other-general

Position: VP, Operations Engineering

██████████ JSA (Dallas)

██████████ anent

Overview

██████████ is a leader in the Data Center owner/operator market and is on an impressive trajectory following their private acquisition in the tens of billions. They're now looking to onboard a Vice President of Operations Engineering to enable their expansion and set standards across their entire portfolio.

Responsibilities

██████████
Work collaboratively across operations teams (Design / Construction / Solutions) to ensure elite-level customer satisfaction/success

Ensure 100% uptime across day-to-day site operations and keep track of performance

Provide solutions to reduce operational costs and maximize infrastructure utilization

Manage project work with field operations, cross-functional teams and customers to highlight engineering changes and implement standardization across sites

Engage in data center capacity and roadmap planning with sales implementations

customer success and portfolio management

Robust knowledge of client SLAs and engineering-specific lease obligations for data center operations

Work with IT teams to confirm solid integration with data center operations and effective communication

Establish strong operational standards across the whole portfolio

Requirements

10+ years of experience holding a leadership position across Data Center or Critical Infrastructure

Proficiency in creating technical documentation and analysis of schematics and development drawings

Strong knowledge of capacity planning, airflow management, power distribution, DCIM software, structured cabling/cable management, and environmental monitoring

Track record of leading and developing successful teams

Why Apply?

Immense scope across the whole US at an established owner/operator

Join a true leader in the market whilst having a significant impact

Generous bonus and long-term incentive package

USA (Dallas)
