

## WMS Project Manager

[Apply Now](#)

Company: DSJ Global

Location: United States

Category: other-general

This is a newly created position that will gather and analyze business requirements, manage vendor relationships, and train and support alignment, documentation, and reporting. You will be responsible for managing the implementation of the Warehouse Management System (WMS) project. You will also work closely with cross-functional teams, including IT, Integration, developers, WMS vendor, and end-users, to ensure project milestones are met.

**Responsibilities**

- Develop and execute comprehensive project plans for the WMS implementation
- Analyze existing workflows, processes, and systems to help identify areas for improvement
- Manage vendor relationships and escalations
- Work closely with operational and technical teams to ensure seamless integration with existing systems
- Oversee the operational customization and configuration process of the WMS to meet specific business needs
- Collaborate with stakeholders to define business requirements and objectives for the WMS implementation

**Qualifications**

- Previous experience of working in a similar role
- Demonstrable experience in project management
- A proven track record in successfully executing multi-disciplined projects from inception through to completion
- Experience of working within logistics and a 3PL environment
- Strong proficiency in WMS platforms
- Strong understanding of warehouse operations and logistics processes
- Industry relevant Project Management qualifications preferred
